100 ans après...

La biodiversité retrouvée sur les champs de bataille de la Grande Guerre

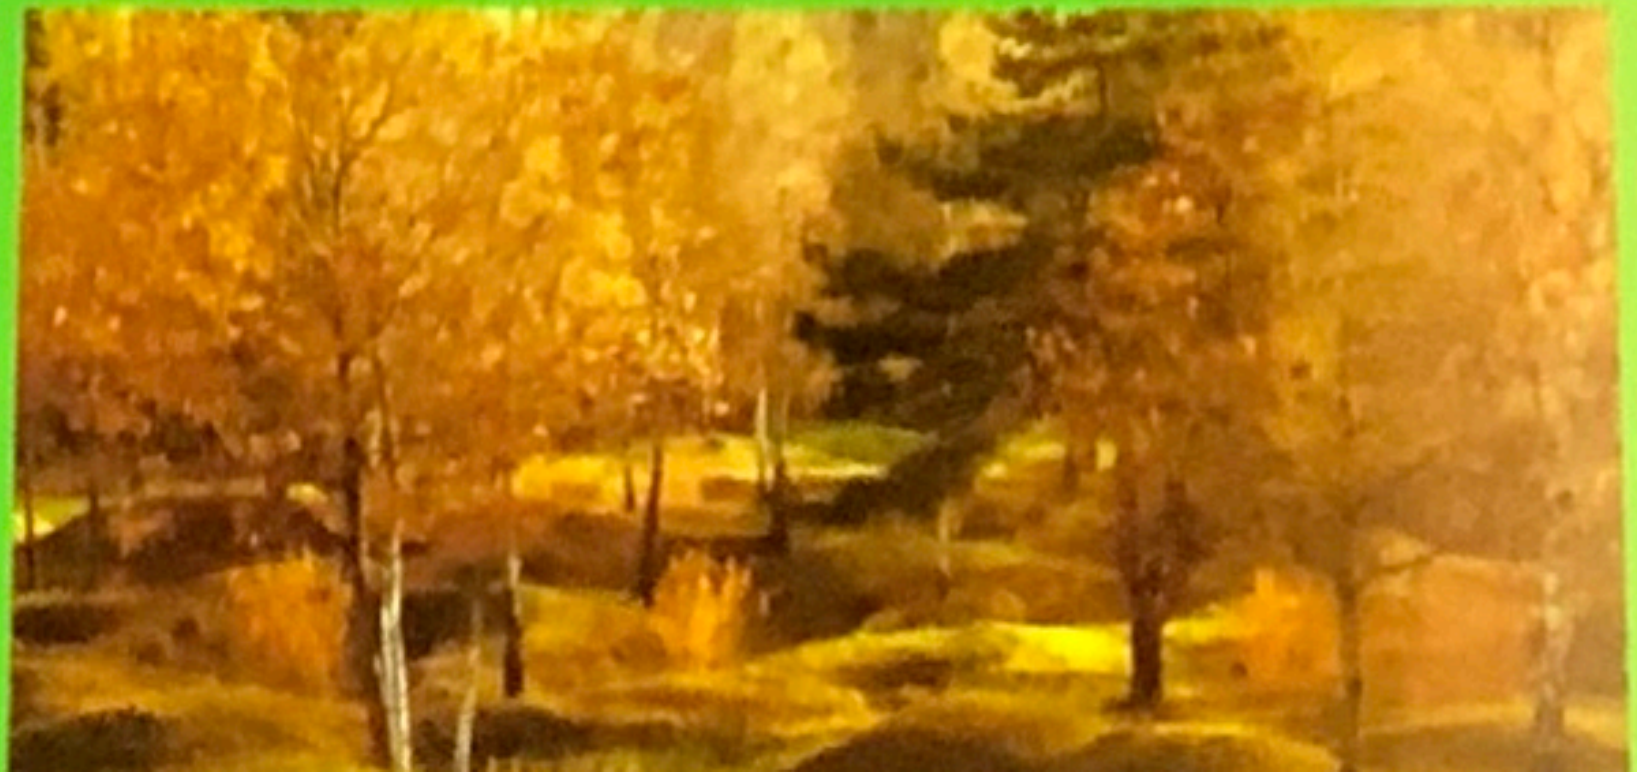
(Faune, flore et orchidées sauvages)

Jean-Jacques Weimerskirch

Trous d'obus omniprésents de différentes tailles en fonction du calibre des projectiles

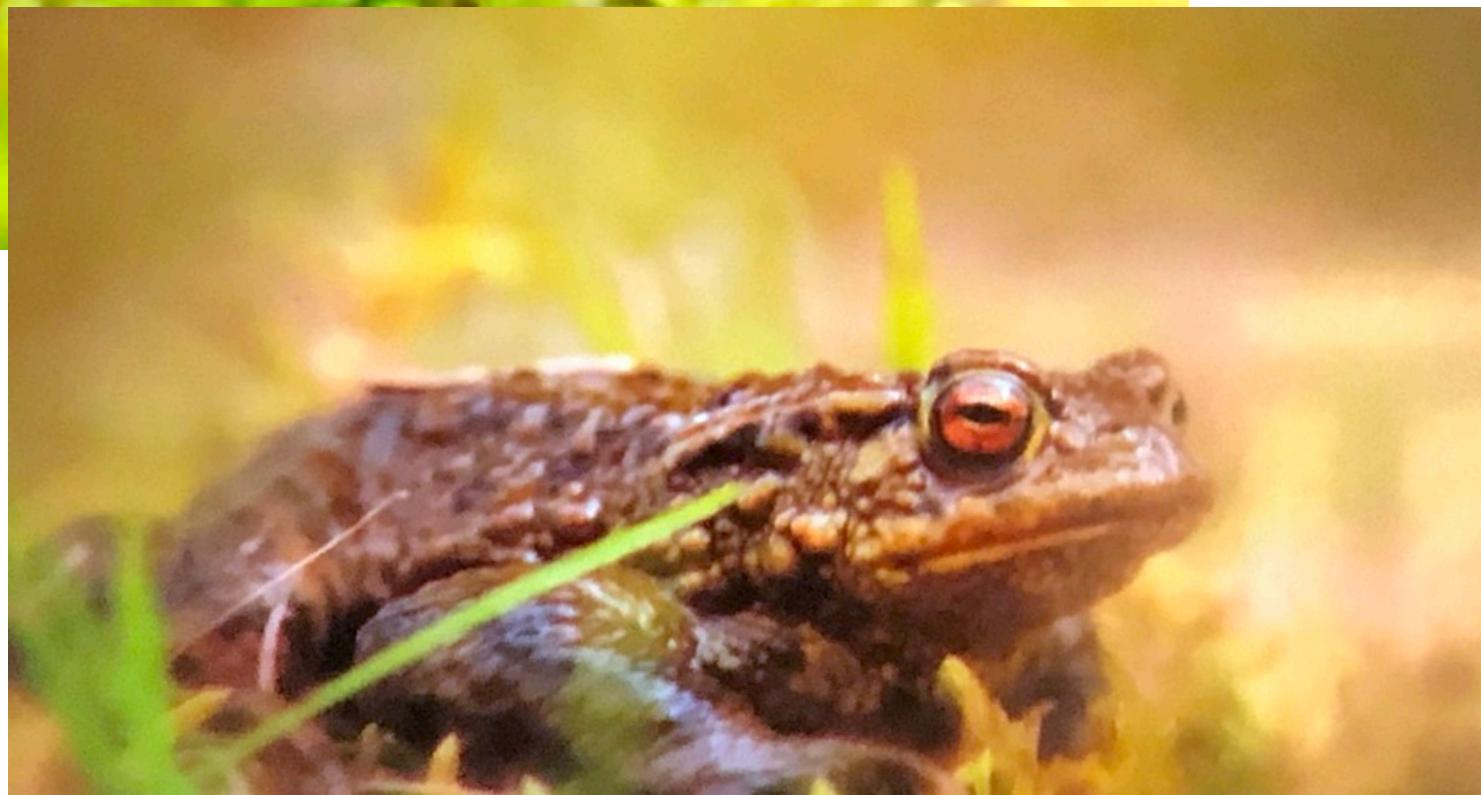
Formation de mares plus ou moins profondes temporaires ou permanentes selo la nature du terrain

Développement d'une biodiversité remarquable



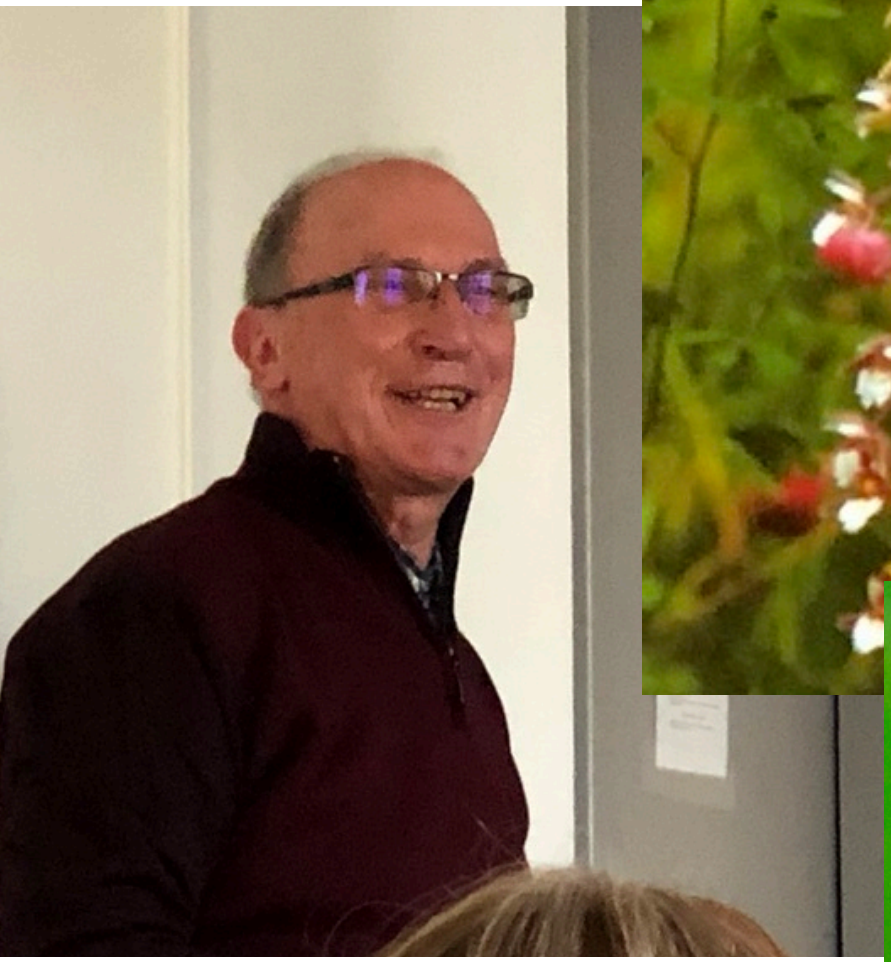
Grenouille
« sonneur à ventre rouge »

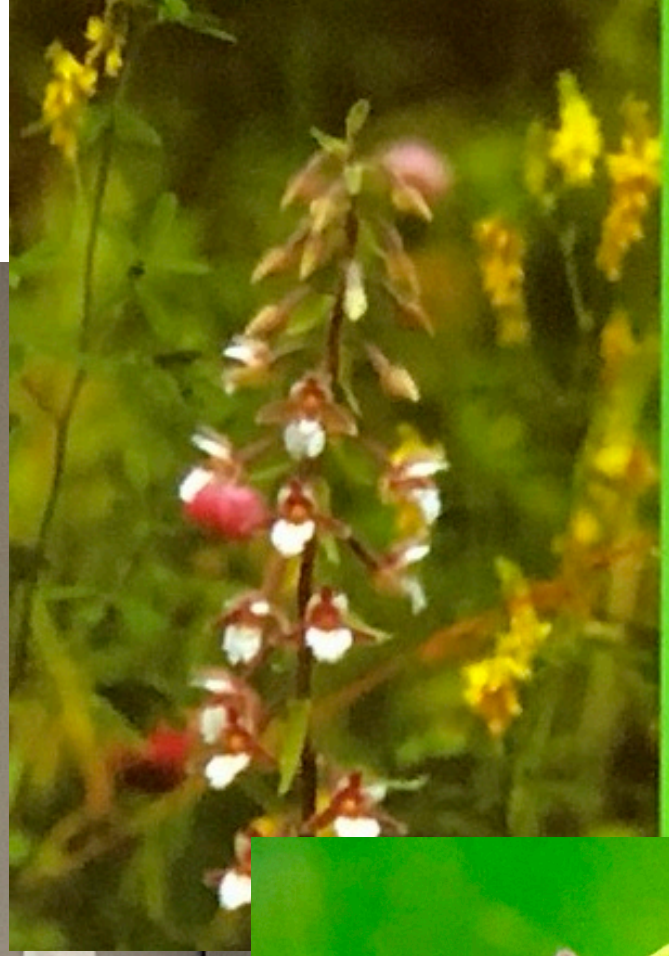
Triton

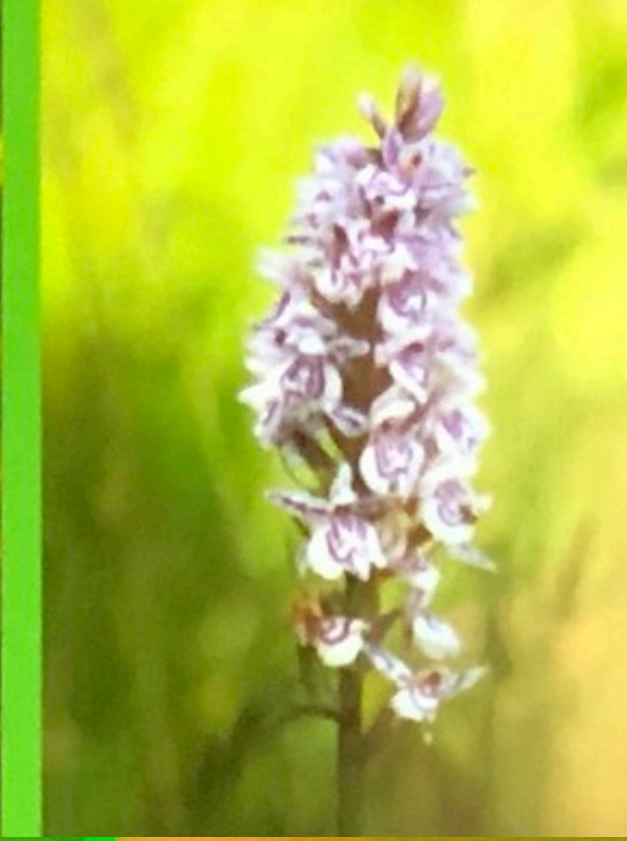


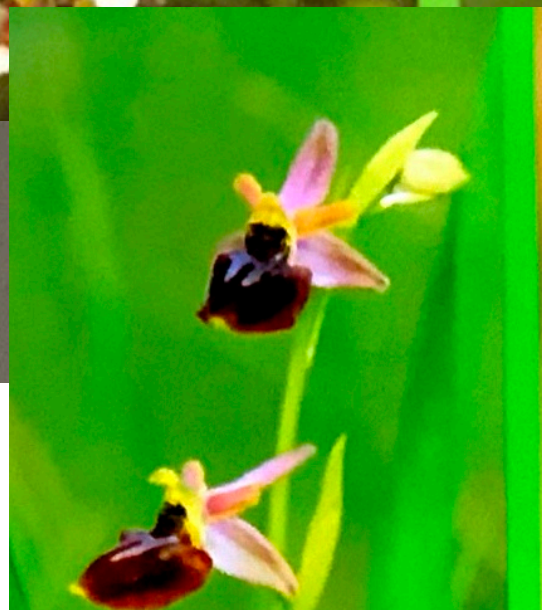
Crapaud

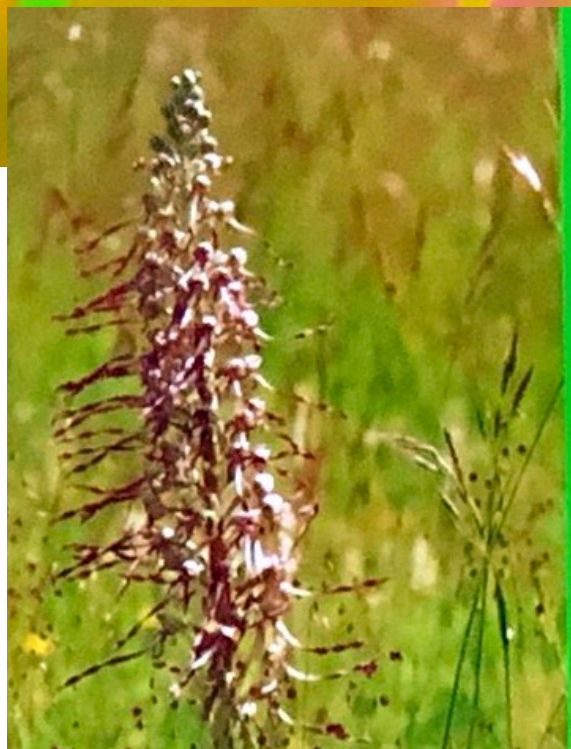
Les orchidées du champ de bataille

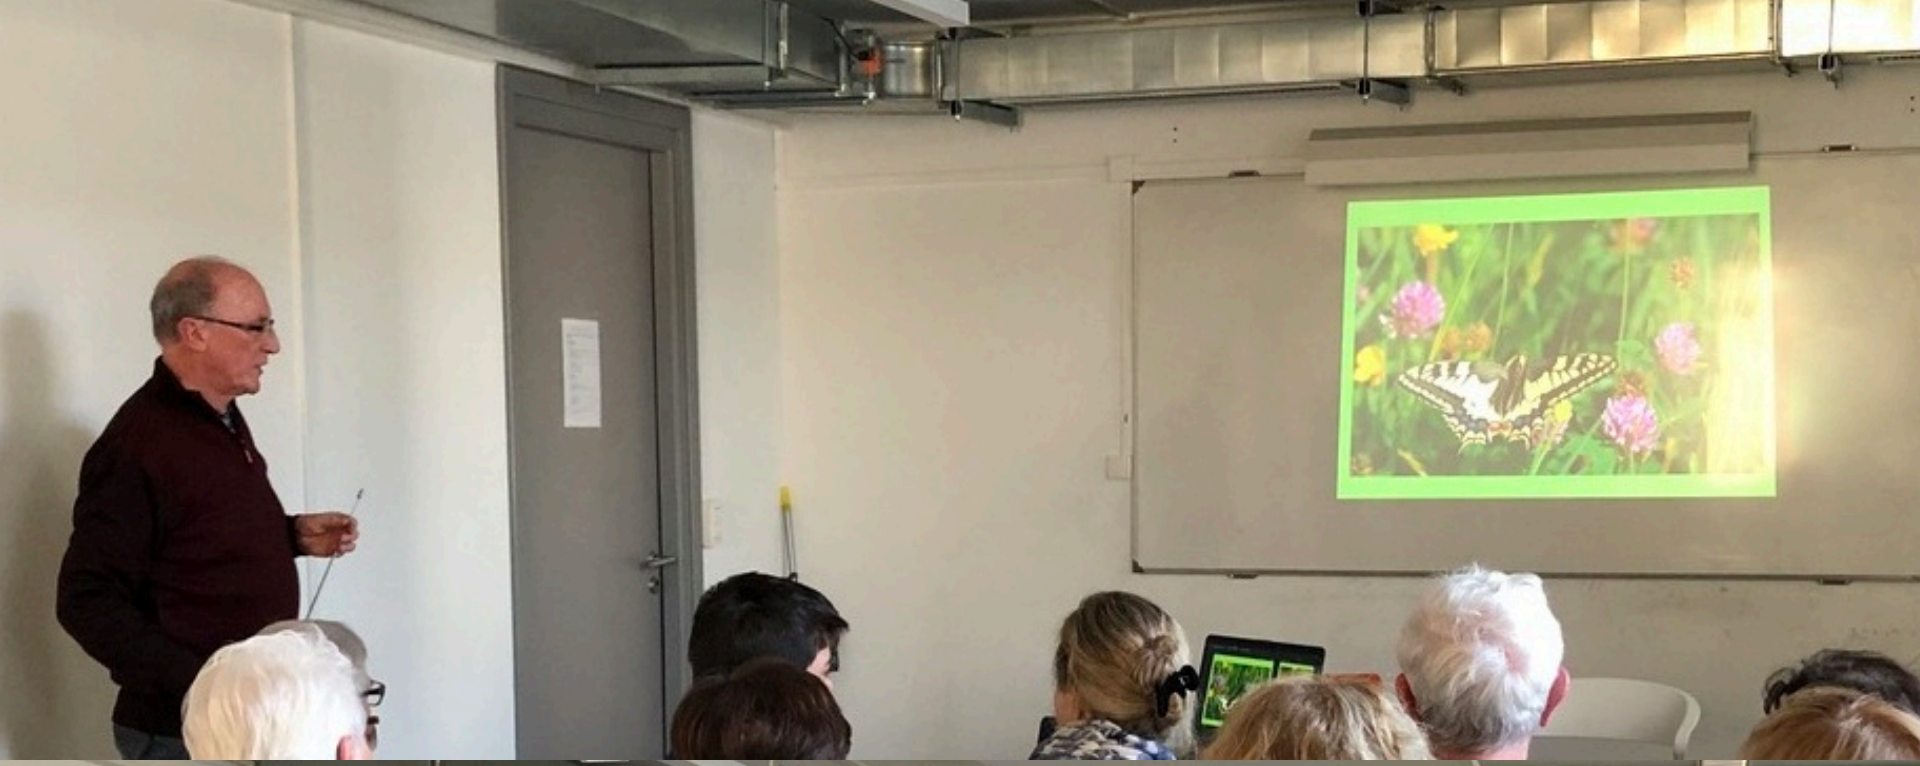


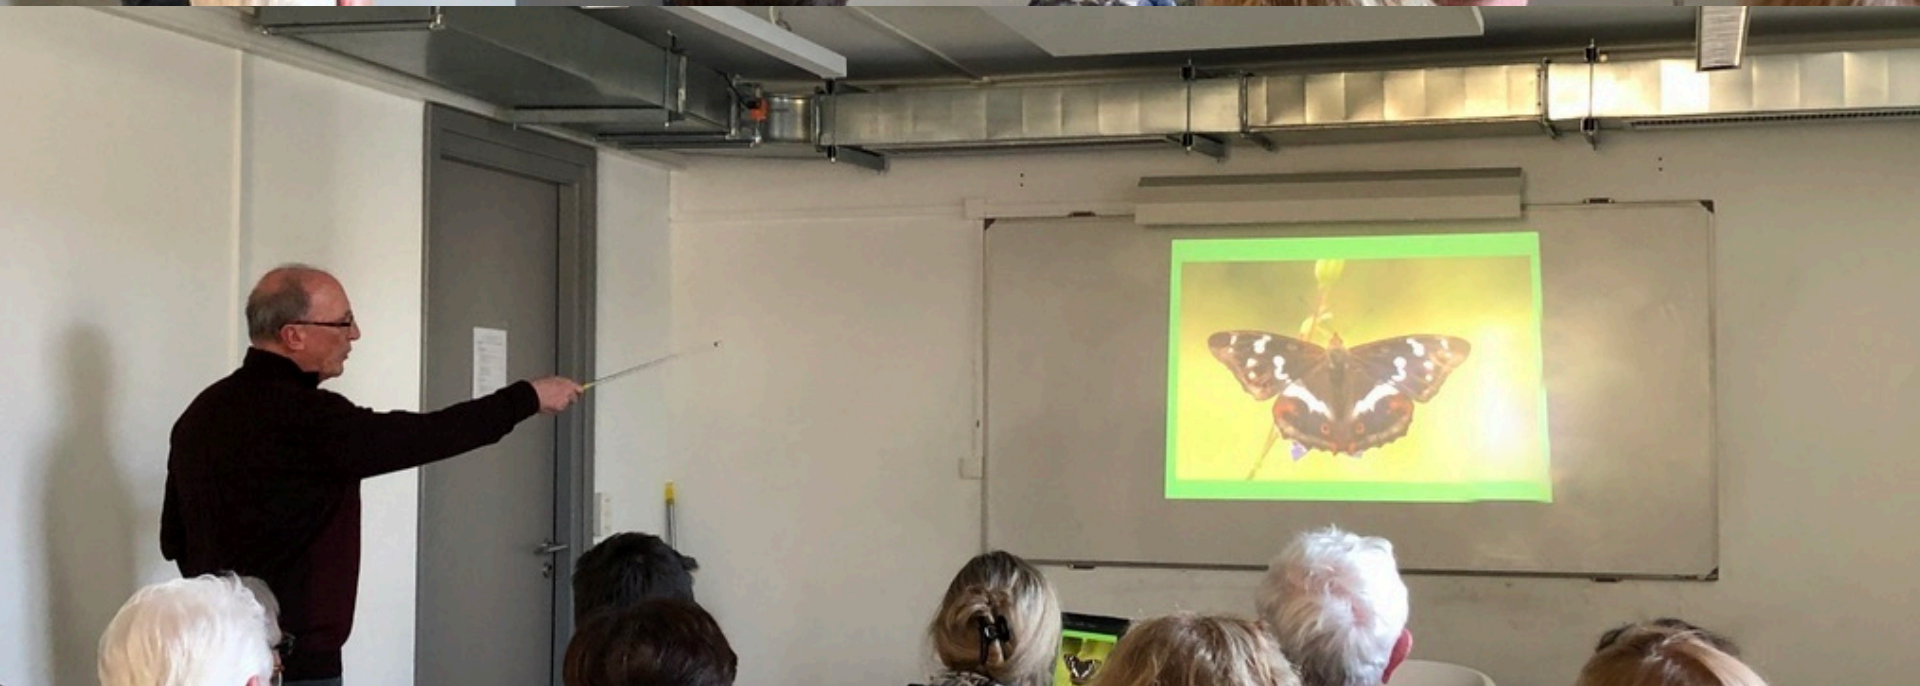


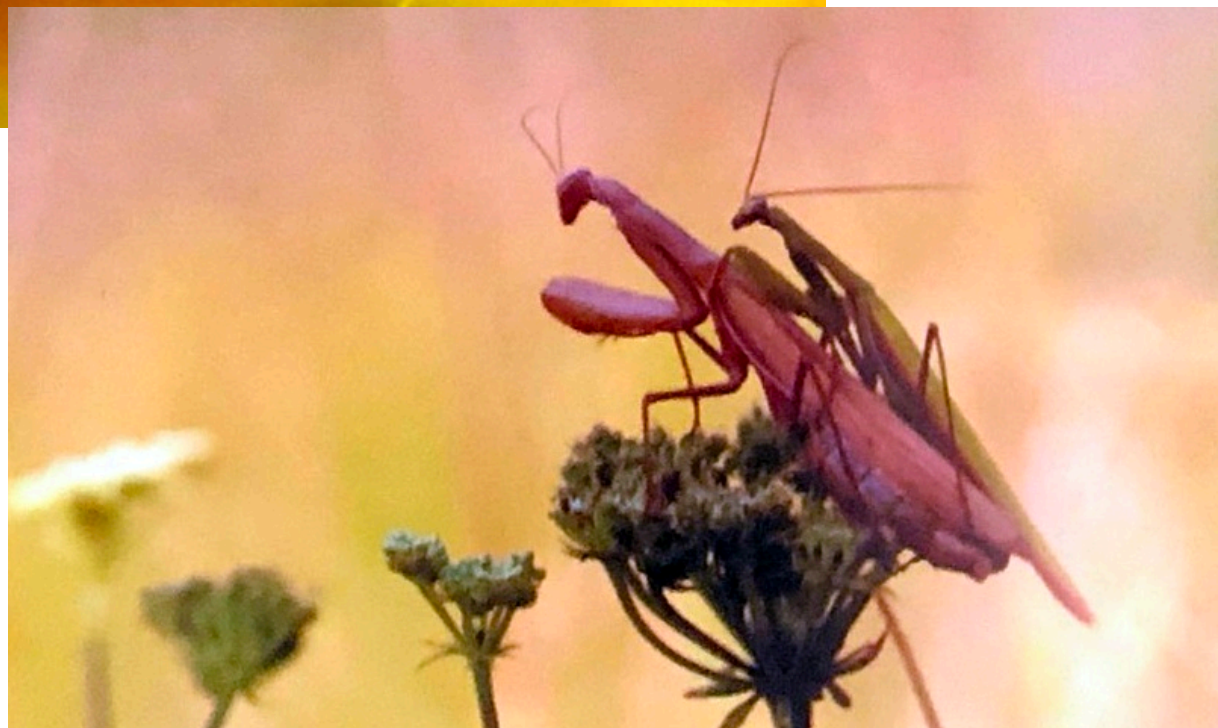












De très nombreuses espèces de chauves-souris

Fort de Vaux
